

# Washington = the Making™ 2040

## Clark County

The Association of Washington Business Institute and the Washington Roundtable are embarking on an initiative to engage Washingtonians to shape an intentional vision for the future of our economy – one that supports economic prosperity in every county. A vision we can work towards with purpose, instead of merely reacting to the forces of change. A vision we can take to policy makers, business leaders and communities to align our strategies with a vision of the future we design.

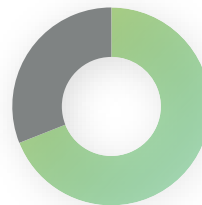

As part of this effort, DHM Research was retained to conduct a survey of 3,500 Washingtonians from every corner of the state. By understanding both our shared values and the elements that make our local communities and economies unique, Washington in the Making 2040 is a vision for Washington driven by the voices of Washingtonians.

*Here's how people think things in Clark County are going...*

**56%**

Rate the economy as good or better

**69%**

Are satisfied with the quality of life in their community.

## Top community issues for Washingtonians in Clark County
